

qMp (Quick Mesh Project) - Packages - Error #380

Modifying wireless settings implies reset of interfaces' roles

12/02/2015 01:15 PM - Victor Oncins

Status:	Tancat	Start date:	12/02/2015
Priority:	Normal	Due date:	
Assignee:	Roger Pueyo Centelles	% Done:	0%
Category:	qMp	Estimated time:	0.00 hour
Target version:		Spent time:	0.00 hour
Description			
I have disabled mesh role of wlan0. After that, I have modified the TX power (Wireless Settings) and the mesh role of wlan0 was enabled again automatically.			
Detected on qMp Clearance 3.1 and Rocket M5
