<b>Description</b>			
In the luci admin module is used the translation function for the entry in the controller file:			
<pre>entry({"admin", "status"}, alias("admin", "status", "overview"), _("Status"), 20).index = true</pre>			
From: <a href="http://luci.subsignal.org/trac/browser/luci/trunk/modules/admin-full/luasrc/controller/admin/status.lua">http://luci.subsignal.org/trac/browser/luci/trunk/modules/admin-full/luasrc/controller/admin/status.lua</a>			
However they are using <code>_()</code> instead <code>translate()</code> . I don't know yet if it is the same funcion or they are different. It has to be checked.
