<b>Description</b>			
<p>Hi,</p> <p>We have noticed that now there are some specific images including qmp-small and qmp-big packages.</p> <p>However, latest 4.0 release does not include any specific qMp repository source regarding packages.</p> <p>So if</p> <p>a) there is no specific image including the qmp-specific packages that fit the hardware or</p> <p>b) the normal hardware-specific image is installed the result is that the qmp-{small,big} package is not installable.</p> <p>Do you know what is the desired way of proceeding with this or a workaround to circumvent this?</p> <p>We are trying to install qMp on Nanostation XW M5.</p> <p>Regards, Jandro Martín guifi.net Madrid</p>			

#### History
